These are the questions I could not answer. He asked about a TRI Scorecard and how they would compare to the NATA info and I had no idea. David Sternberg was supposed to find someone who could speech about the scorecard and somehow Jeff Landis punted to HQ...which probably wasn't necessary. Not sure how this got to Samantha other than that WV is considered an EJ area due to low income.

Hi Alice,

My password expired and I could not get to my email. Samantha got this on Friday. Could you please take a look and see if we can help with the responses to the questions?

Thanks, Cristina

We are gathering the tri data and I will touch base with Alice Chow, as the email states that she was interviewed about etc. This question and our response is complicated by the combination question here. We will get back to you by 930 am Monday- as I am having issues tracking down everyone this Friday afternoon.

Samantha,

Could you please help us with the media request below about Kanawa County, WV?

Chitra

**Subject:** FW: MEDIA QUERY: Gazette-Mail/Union Carbide & Toxic Release Questions

OPA sent over a media request for OEJ to answer. I am not familiar with the area in question, but if I can get some bullet points I can put a formal response together. Deadline is noon Monday (quick). The question for us is:

*What environmental justice concerns, if any, does EPA have about Kanawha County, W.Va., whose poverty rate was nearly 6% higher than the national average in 2019 and which had four of the 41 Census tracts with the highest total cancer risk nationwide in the 2014 NATA?*

Thanks,  
Christina

Hey Christina,

Could you help us with a response to question 4 about the EJ concerns? We think there may be one sentence on the TRI changes that we can link to EJ, but the question is a bit deeper than that and we thought it should probably go through you for the meat of the response. **Deadline is Monday at noon.**

Thanks!

Dominique

**Subject:** Gazette-Mail/Union Carbide & Toxic Release Questions

Hello:

My name is Mike Tony, and I'm a reporter with the Charleston (W.Va.) Gazette-Mail. I interviewed Alice Chow of EPA's air quality analysis branch last week about EPA and West Virginia Department of Environmental Protection air and risk exposure modeling efforts at Union Carbide facilities in Institute and South Charleston, W.Va. She deferred comment on a few toxic release inventory-related questions I had since that's not her focus area, and I wanted to see if you might be able to set up a phone interview sometime next week with an EPA official who could answer the following questions and perhaps a few others as I continue

research on this subject. I can be reached via email or at 304-348-1236. Thanks so much for any help you can provide.

1. The EPA says ethylene oxide releases decreased 29% from 2007 to 2019 nationwide, but according to its facility report, the South Charleston Union Carbide facility released three times more ethylene oxide in 2019 than it did in 2010. Does EPA know what is causing this increase, and does it run counter to ethylene oxide emissions trends nationwide?
2. The RSEI score in 2019 for the Union Carbide facility in Institute, W.Va. was 350,377 and the RSEI score for the Union Carbide facility in W.Va. was 732,408. The U.S. median was 14. How should local residents think about that discrepancy in RSEI scores?
3. The Union Carbide facility in Institute's release of nitrate compounds has increased significantly in recent years, from 171,744 in 2016 to 585,489 in 2019. Does EPA have any insight into why and what the potential health risks are from nitrate compound releases?
4. What environmental justice concerns, if any, does EPA have about Kanawha County, W.Va., whose poverty rate was nearly 6% higher than the national average in 2019 and which had four of the 41 Census tracts with the highest total cancer risk nationwide in the 2014 NATA?
